Technical Program Manager / Engineering Lead · 13+ years leading cross-functional delivery, engineering teams, and platform strategy across cloud-based SaaS products

PROFESSIONAL SUMMARY

Technical Program Manager and Engineering Lead with 13+ years driving complex, cross-functional programs from discovery through production — including stakeholder alignment, roadmap execution, risk management, and team coordination across distributed, multi-timezone environments. Served as Release Train Engineer on a \$1M enterprise platform, led teams of up to 15 engineers, and consistently translated business objectives into technical execution plans. Pairs this program leadership with deep technical fluency in .NET, Azure, and cloud-native architectures, allowing for credible technical decision-making, risk assessment, and engineering team mentorship alongside program delivery.

EXPERIENCE

Senior Software Engineer / Delivery Lead · Moneysupermarket Group · London, UK Mar 2023 – Dec 2025

- Owned end-to-end program delivery across Pet, Life, and Travel Insurance verticals on a high-traffic price comparison platform serving millions of users, coordinating 4 cross-functional teams (product, design, QA, engineering) across 3 time zones.
- Led the Pet Insurance platform migration program to a TypeScript/Vue framework — managing scope, timeline, and stakeholder communication — cutting time-to-market for product configuration changes by ~40% across a 6-month delivery cycle.
- Drove adoption of AI-assisted development tooling (GitHub Copilot, Claude Code) across a 10-person engineering team, defining standards and measuring impact — team reported ~20% reduction in repetitive coding tasks within 3 months.
- Directed CI/CD pipeline strategy and Git governance standards across 3 product verticals, reducing build failures and improving release reliability for a weekly deployment cadence.
- Coordinated delivery for an AWS cloud migration program, managing serverless function rollout (Lambda, TypeScript) within a Landing Zone architecture as part of a multi-team, multi-quarter initiative.

Senior Software Engineer · EDF Trading · London, UK Jun 2022 – Feb 2023

- Directed the full redesign program for a Power trading application on Azure (AKS, Service Bus, Azure DevOps), serving as technical point of contact and program coordinator across architecture, backend, and DevOps workstreams for a 4-engineer team.
- Translated complex business requirements into architectural decisions, reducing design-to-dev handoff cycles from ~3 rounds to 1 by establishing a clear technical decision log reviewed weekly with stakeholders.

Engineering Lead / Senior Consultant · ADP · Hyderabad, India Mar 2021 – Apr 2022

- Led a 3-engineer team through full redesign of a major payroll product module — managing timeline, coordinating with business analysts, and driving code reviews — delivering all milestones within a 9-month program.
- Defined team development standards and code review practices, reducing rework on code reviews by an estimated 25% over two quarters.

Assistant Manager — Engineering Program Lead · Deloitte · Hyderabad, India May 2019 – Mar 2021

- Served as Release Train Engineer and delivery lead for a \$1M pre-hire onboarding platform — managed a 15-engineer team, facilitated PI planning across 4 PIs, and coordinated with 6+ executive stakeholders from discovery through production launch.
- Ran client whiteboarding sessions and defined UX wireframes, architectural boundaries (microservices, DB design, identity management, cloud deployments), and story estimation — accelerating requirements sign-off by 2 weeks per quarter.
- Led a 5-engineer cross-functional team including a remote team in Argentina to deliver a Recognition Portal on schedule, establishing async communication rhythms that reduced status-meeting overhead by ~30%.

- Owned full program lifecycle across both initiatives: scope definition, risk identification, sprint planning, release management, and post-launch support across 18+ months.

Senior Analyst / Analyst · Deloitte · Hyderabad, India 2012 – May 2019

- Delivered dashboards, REST APIs, and integrations (SAP HANA, Salesforce, Vanguard) for HR, Finance, and Compensation platforms across 5+ concurrent workstreams, consistently meeting stakeholder timelines over 7 years.
- Coordinated with business stakeholders to gather requirements, estimate effort, and manage delivery of change requests — handling 20+ feature enhancements annually across multiple product teams.

TECHNICAL PROFICIENCY

Languages & Frameworks: C#, .NET Core, TypeScript, JavaScript, Vue.js, Angular, SQL

Cloud & DevOps: Azure (App Services, DevOps, Service Bus), AWS (Lambda, S3, Landing Zone), CI/CD, GitHub Actions, Datadog

Databases: SQL Server, PostgreSQL, MongoDB

PM & Delivery Tools: Azure DevOps, JIRA, SAFe, Scrum, Agile, Roadmapping

AI Tooling: GitHub Copilot, Claude Code — workflow integration, team enablement

EDUCATION

B.Tech, Computer Science · G. Narayanamma Institute of Technology and Sciences · 2008–2012

CERTIFICATIONS & DEVELOPMENT

PMI-ACP / PMP (in progress) — currently pursuing to formalize program management credentials alongside transition to TPM role.
