*Technical Program Manager | Senior Software Engineer transitioning to TPM · 13+ years leading cross-functional delivery, platform strategy, and engineering teams across cloud-based SaaS products*

## PROFESSIONAL SUMMARY

---

Senior Software Engineer transitioning to TPM with 13+ years of full-stack development experience and a proven record of driving complex, cross-functional programs to delivery. Combines deep technical fluency in .NET, Azure, and cloud-native architectures with strong program leadership skills — including stakeholder alignment, roadmap execution, risk management, and team coordination across distributed, multi-timezone environments. Served as Release Train Engineer on a \$1M enterprise platform, led teams of up to 15 engineers, and consistently bridged the gap between business objectives and technical execution. Now seeking to formalize this leadership impact in a dedicated Technical Program Manager role.

## CORE COMPETENCIES

---

- Program & Roadmap Delivery ▪ Cross-functional Stakeholder Management
- Agile / SAFe / Scrum Facilitation ▪ Risk Identification & Mitigation
- Technical Architecture & System Design ▪ Engineering Team Leadership & Mentoring
- CI/CD & DevOps Governance ▪ Multi-timezone Team Coordination
- AI Tooling Integration & Productivity ▪ Vendor & Dependency Management

## EXPERIENCE

---

**Senior Software Engineer / Delivery Lead** · Moneysupermarket Group · London, UK *Mar 2023 – Dec 2025*

- Owned end-to-end delivery of features across Pet, Life, and Travel Insurance verticals, coordinating across product, design, QA, and engineering to hit release milestones on a high-traffic price comparison platform serving millions of users.
- Led the migration program for the Pet Insurance platform to a new TypeScript/Vue framework, managing scope, timelines, and stakeholder communication — reducing time-to-market for product changes by eliminating manual configuration overhead.
- Drove adoption of AI-assisted development tooling (GitHub Copilot, Claude Code) across the team, defining standards for use, measuring productivity impact, and embedding practices into the team's engineering workflow.
- Maintained and evolved CI/CD pipelines and Git governance standards, ensuring build stability and reliable continuous delivery across multiple product verticals.
- Contributed to AWS cloud migration program, coordinating serverless function delivery using Lambda and TypeScript within a Landing Zone architecture.

**Senior Software Engineer** · EDF Trading · London, UK *Jun 2022 – Feb 2023*

- Delivered a full redesign of a Power trading application on Azure (AKS, Azure Service Bus, Azure DevOps), coordinating technical delivery across architecture, backend, and DevOps workstreams.
- Acted as technical point of contact for the redesign initiative, translating business requirements into architectural decisions and ensuring alignment between stakeholders and engineering execution.

**Engineering Lead / Senior Consultant** · ADP · Hyderabad, India *Mar 2021 – Apr 2022*

- Led a 3-engineer team through the full redesign of a major payroll product module — managing timelines, coordinating with business analysts, driving architectural decisions, and conducting code reviews to ensure quality and delivery.
- Defined team development standards and introduced AI-assisted tooling to improve delivery consistency and reduce rework across the team.

**Assistant Manager — Engineering Program Lead** · Deloitte · Hyderabad, India *May 2019 – Mar 2021*

- Served as Release Train Engineer and delivery lead for a \$1M pre-hire onboarding platform — managing a 15-engineer team, facilitating PI planning, coordinating with executive stakeholders, and driving end-to-end delivery from discovery to production.

- Ran client whiteboarding sessions, defined UX wireframes, managed story point estimation, and made architectural decisions (microservice boundaries, DB design, identity management, cloud deployments) in alignment with business goals.
- Led a 5-engineer cross-functional team — including a remote team in Argentina — to deliver a Recognition Portal on schedule, managing cross-timezone coordination, dependency tracking, and stakeholder reporting.
- Owned the full program lifecycle across both initiatives: scope definition, risk identification, sprint planning, release management, and post-launch support.

**Senior Analyst / Analyst** · Deloitte · Hyderabad, India

2012 – May 2019

- Delivered dashboards, REST APIs, and integrations (SAP HANA, Salesforce, Vanguard) for HR, Finance, and Compensation platforms — consistently meeting stakeholder requirements and project timelines.
- Coordinated with business stakeholders to gather requirements, estimate effort, and manage delivery of change requests and feature enhancements across multiple concurrent workstreams.

## TECHNICAL PROFICIENCY

---

**Languages & Frameworks:** C#, .NET Core, TypeScript, JavaScript, Vue.js, Angular, SQL

**Cloud & DevOps:** Azure (App Services, DevOps, Service Bus), AWS (Lambda), CI/CD, GitHub Actions

**Databases:** SQL Server, PostgreSQL, MongoDB

**PM & Delivery Tools:** Azure DevOps, JIRA, SAFe, Scrum, Agile, ADO, Roadmapping

**AI Tooling:** GitHub Copilot, Claude Code — workflow integration, team enablement

## EDUCATION

---

**B.Tech, Computer Science** · G. Narayanamma Institute of Technology and Sciences · 2008–2012

## CERTIFICATIONS & DEVELOPMENT

---

*PMI-ACP / PMP (in progress) — currently pursuing to formalize program management credentials alongside transition to TPM role.*
